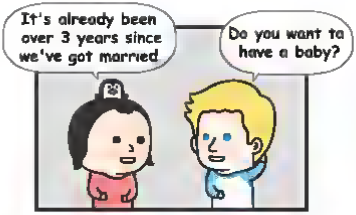
Finally, I decided to use my last method that every kid in the world is afraid of.

It must really hurt. People have said that my body shape and skin will break down and I will always feel tired
Also it casts a lot of money

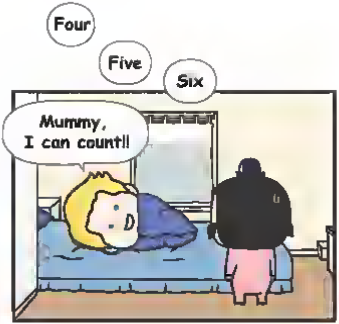
Because I don't think I'm ready yet

But...



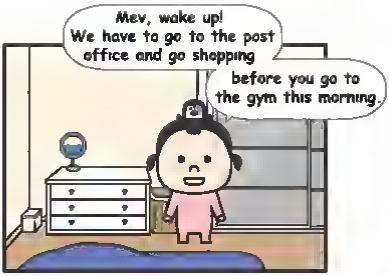
I know that it doesn't always work as couples plan but....

...we don't plan to have children for another couple of years.

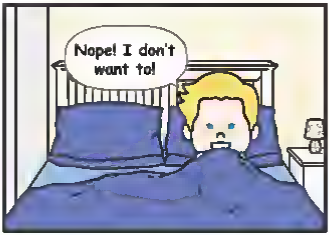


This is what I'm afraid of
- that I might have a son
just like him in the future.

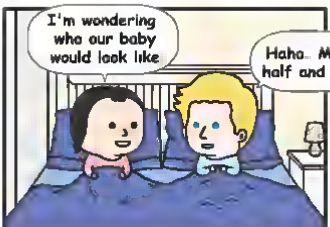
... he gave me a chance to practice being a mother.



It was a busy morning with lots of things to do but ...



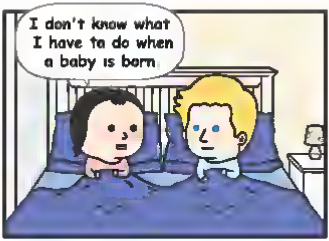
... Mev didn't move from under his blanket.
And then,...

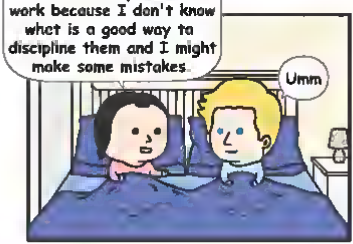


... I can't resist imagining about our future baby sometimes.

It's really exciting and interesting that a new person can be made half of me and half of Mev.

However, at the same time, it's very scary to walk into a marvelous but unknown area.

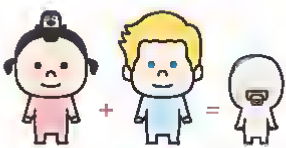




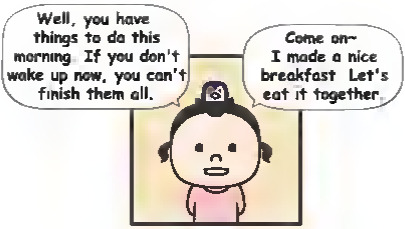
I'm afraid that raising a kid is a very difficult work because I don't know what is a good way ta discipline them and I might make some mistakes
Umm

We talked about it for a while.

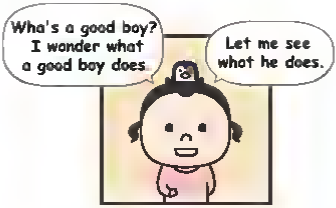
A Good Mother



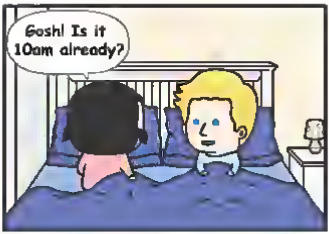
Sometimes people ask me
when we would like to have a baby.



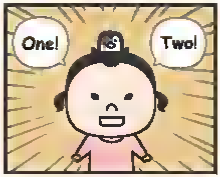
Well, you have things to do this morning. If you don't wake up now, you can't finish them all.
Come on~ I made a nice breakfast. Let's eat it together.



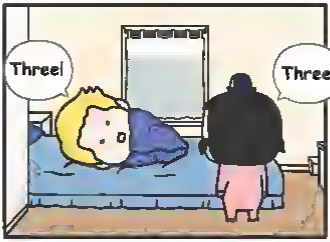
I used a few different methods to make him wake up but none of them worked.



Then I realized the time.



Counting to 3!



I thought that it was silly
but anyway I tried to wake Mev up
by being a nice mother.

But my son Mev still didn't look like
he would wake up.
